BAG FOR DRY SUIT

This huge bag made of cordura will keep your car dry after your dives and will work perfectly as a changing mat as well!

DRY SUITS

NEW DRY SUIT IN PRE-COMPRESSED NEOPRENE WITH BACK BDM ZIPPER.

The advantages of neoprene dry suits against the more popular dry suits in trilaminate are:

- Easy repair and maintenance.
- Some thermal insulation so no undersuit or just a thin one will be enough for most water temperatures.
- Elasticity (neoprene is stretchy, so it can be a little tighter on the body still allowing movement).
- Price (roughly 30 to 40% cheaper than a trilaminate).

The disadvantages are:

- Heavier weight.
- Takes longer to get dry.
- Back zipper needs other's help to close the zipper (in fact there are DIY tricks)
- Compression at depth (even though the neoprene is pre-compressed) and subsequent change in buoyancy.
- Less flexible for those who dive in both cold and warm waters, since you don't have the flexibility of using different undersuits according to the water temperature.

WHALE SKINSUIT

Our new Whale skinsuits have been especially designed for all water sports, in and outside of the water.

Whale CQQ (55% POLYESTER, 36% NYLON, 8% SPANDEX, 1% PU) is a completely new fabric developed with the aim to minimize thermal loss, thanks to a high quality super warm fleece for the inside layer, and keep you dry thanks to a water repellent outside lining. Thanks to these properties Whale fabric is just ideal for scuba diving, freediving, surfing, windsurfing, sailing, kayaking... and everywhere it's wet or windy.

In scuba diving our Whale skinsuits can be used both as a garment under your dry or even neoprene suit as well as a standalone protective suit equivalent to a 5 mm neoprene suit with the advantage of being neutrally buoyant and extremely fast in drying thanks to the water repellent outer layer. Furthermore, thanks to its flexibility and elasticity our skinsuits will not at all constrain your movements and therefore will make your dive much more comfortable.

COMPLETE BCS

COMPACT LITE 14L

Built for travellers, Compact Lite 14L is a light and streamlined BCD weighing only 2.5 kg. The bladder has a volume of 14 liters and comes in red, black, pink camouflage as well as bullet proof kevlar. The shoulder buckles are secured with a bungee to facilitate the wearing and to increase safety by preventing complete opening of the shoulder strap in case of an unwanted opening or malfunctioning of the buckle. Side pockets are attached to the waist strap with a glider and are available in more colour combinations (codes 240306 and 240307). The tank is fixed in three different positions: with a standard cam buckle cylinder strap, a simple velcro cylinder strap and 25mm webbing strap to be tightened around the neck of the tank. Additional weights can be put in the 2 weight pockets (each up to 2,5kgs) on the single tank stabilizer. This BCD can be used with a single 12l cylinder. The inflator is 400 mm / 16" long. 6 aluminium D rings. Available with quick adjust waist plastic buckle or aluminium buckle on request.

The additional bungees will prevent the complete opening of the shoulder strap in case of opening or malfunctioning of the buckle during the dive.

cylinder strap with rubber coating on the inside

cylinder straps with weight pocket and tank stabilizer

Securing the tank with the upper 25mm webbing around the neck and valve is very important!

LZ ULTRA LIGHT 11L WITH HARD PLATE COMPLETE SET UP

This set up includes a small 11 litres Ultra Light style bladder mounted on a harness with aluminium backplate. It features double cylinder straps, extremely flexible oval inflator hose and a single tank adapter. Thick padding on backplate and shoulder straps together with a soft neoprene layer on the crotch strap ensure your comfort and protect your suit from abrasion! There are 8 stainless steel D rings in total and a stainless steel waist buckle.

COMFORT TECH 30 + 30 L / 66 LB + 66 LB

Basic Tech and Comfort Tech are high volume BCDs designed for advanced technical divers. Basic Tech consists of a stainless steel back plate with webbing harness, shoulder neoprene padding, crotch strap and pockets for second mask or other accessories. In Comfort Tech the back plate is hidden inside a pocket and also in this case we have a crotch strap, shoulder padding and pockets for second mask and other accessories. For both models there is the possibility to choose among single or double bladders of 30l/66lbs each. The external cover of the bladder and the pockets are in Cordura 1500. Many stainless steel D-Rings for equipment fitting. 12 surgical tubes are wrapped around the bladder, in order to correct the balancing, reduce water resistance and speed up deflation.

230211

BLADDER FOR COMFORT/BASIC TECH

With two inflators (600mm item #901015 and 400mm item #901020) and two inside bladders of 30 l / 66 lb each.

S.S. backplate hidden in the pocket

External bladder can be in red as well!

230210

BLADDER FOR COMFORT/BASIC TECH

With one 600mm inflator (item #901015) and one inside bladder of 30 l / 66 lb.

Available also with slots for the cylinders straps

CUSTOM HARNESSES & BLADDERS

WE PRODUCE OUR OWN BCDS AND BLADDERS!

This allows us maximum flexibility as regards to colour combinations or personalization of the products. These are just some examples!

Want to have a personalized bladder with your flag on it?
WE CAN DO IT!

SPECIAL EDITIONS SERIES

HERE SOME READY-TO-USE SET UPS

SIDEMOUNT BCS

Harness for Sidemount MOD (240028)
+ main 15l bladder (240021 black, or 240022 red, or 240023 kevlar)
+ additional 12l bladder (240026)

240021 Inside bladder: Nylon 290D • Outside bladder: Cordura 1000 • colour: ■
240022 Inside bladder: Nylon 290D • Outside bladder: Cordura 1000 • colour: ■
240023 Inside bladder: Nylon 290D • Outside bladder: Kevlar • colour: ■

SIDEMOUNT MODULAR 15+12

Advantages:

- The harness is 100% modular and very quickly adjustable to any body size
- 4x2kgs weight pockets on your back allow perfect trim control (on demand 4x3kgs)
- Additional quick release 1kg weight pockets with gliders to be positioned on your shoulders, waist or any other webbing strap
- Two interchangeable bladders:
Main bladder: 15kgs lift
Secondary bladder: 12kgs lift
- Possibility to use bungees with double ended hooks to make the bladders removable even during the dive
- Separate butt and battery plates on your crotch strap
- Large pockets for accessories included
- Crotch strap in soft 50mm webbing

BLADDER SIDEMOUNT MOD

240028

HARNESS FOR SIDEMOUNT MOD

To be fixed on the upper eylet of the main bladder with a BP screw

240026

ADDITIONAL BLADDER

The secondary bladder should be installed using a BP screw on the top eylet and letting the bungee through the eylet at the bottom. The secondary bladder should be positioned upside down between the weight pockets and the main bladder. The inflator of the secondary bladder will be on the inside of the bladder and coming from under the right armpit. The inflator of the main bladder will come, as traditionally, from the left side.

To be fixed on the lower eylet of the main bladder with a bungee

240029

QUICK RELEASE WEIGHT POCKET

Fits a 1kg weight and can be positioned anywhere on the webbing strap allowing a perfect fine tuning of your trim!

240027

ACCESSORIES POUCH

With small compartments and net for water drainage

This sidemount BCD has a volume of 15l, has 3 velcro weight pockets hidden behind the back polstering, 1 zipper pocket on the highest part of the bladder (just behind the neck), plus two additional pockets on the waist belt. This makes buoyancy adjustments very easy and flexible. The harness exists in two different versions: one can be adjusted only through the waist belt and one has an easy quick adjust buckle on the shoulder level. Bungee for attaching tanks can be easily adjusted in length. It comes in 4 different versions of the bladder (red, black cordura, pink or Kevlar)

240082 Sidemount BC, 1225 Tec • no buckle no valve at the top
Inside bladder: Nylon 290D • Outside bladder: Cordura 1000 • colour: 

240083 Sidemount BC, 1225 Rec • with buckle and valve at top back
Inside bladder: Nylon 290D • Outside bladder: Cordura 1000 • colour: 

SIDEMOUNT BC 1225

Our sidemount BC 1225 has a 12 liters bladder that comes in 4 different colours of the external bladder made in Cordura 1000: blue or pink camou, red and black. 4 pockets for weights (for total 8kgs) are positioned between the back of the harness and the bladder and ensure perfect trim control, by positioning of the weight at the desired height. Comfort is guaranteed by shoulder covers and a soft padding on the back. Inflator with flexible high volume oval corrugated rubber hose is positioned on the left lower front part of the bladder and can be interchanged with the OPR valve positioned on the right side. There are two versions: Rec and Tec. The Rec version has quick release buckles on the shoulders for easier adjustment and wearing and a second OPR valve on the top corner of the bladder for vertical deflation. The crotch strap is made of 50mm webbing covered by a soft neoprene layer that will protect your suit from abrasion.

RECOMMENDED
Set of 2 tank rigging
system for sidemount
cylinders with S.S.
cam buckles and
a 98mm SS spring
(code #801650),
plus line

detail of the adjustable
shoulder buckle

detail of the second
OPR valve for the
REC version

4 weight pockets along the back allow
adjusting trim with maximum storage
of 2kgs rubber coated weights (3kgs
in case of soft lead)

SIDEBACK 16L

standard harness
and backmount set up

4 velcro pockets (2kgs each) behind
the back polstering

backmount set up with two cylinder straps,
weight pockets and tank stabilizer

sidemount setup with
no cylinders straps
and bungees

SIDEBACK DETACH 16L

240079

This sidemount BCD has an oval bladder and therefore can be used also as a backmount BCD by installing tank straps and switching the position of the inflator with the valve. The volume of the bladder is 16litres and the inflator is 400mm long. The harness comes in two versions: with a plastic buckle on the shoulder level (DETACH version) for easy unwearing or with no shoulder buckle (DIR style). Four weight pockets (each can hold up to 2kgs) behind the back polstering plus two (of 3kgs each) on the cylinder strap are included in this set up.

240366

SIDEMOUNT ADJUSTABLE WAIST RING

SM quick adjust waist belt ring - the ring can be moved along the webbing only when in perpendicular position, allowing easy and quick adjust during the dive when cylinder buoyancy changes from negative to positive.

CHARGER
FOR SY450

- All our torches from the SY line have the following common features:
- Integrated microprocessor maintaining a constant current and preventing over-heating
 - Reverse polarity protection preventing circuit break from wrong battery installing
 - Constructed with aircraft-grade T6061-T6 aluminium
 - 5 mm toughened glass lens, coupled with three O rings for maximum waterproofness
 - Premium type III military hard-anodized finish providing excellent abrasion and corrosion resistance
